## GitHub Pages

[GitHub Pages](#) is designed to host your personal, organization, or project pages from a GitHub repository.

## Build and deployment

### Source

Deploy from a branch

### Branch

Your GitHub Pages site is currently being built from the `main` branch. [Learn more about configuring the publishing source for your site.](#)

🔗 main

📁 / (root)

Save

Learn how to [add a Jekyll theme](#) to your site.

## Custom domain

Custom domains allow you to serve your site from a domain other than `jonathanfink0612.github.io`. [Learn more about configuring custom domains.](#)

Save

Remove

### ☒ Enforce HTTPS

— Required for your site because you are using the default domain (`jonathanfink0612.github.io`)

HTTPS provides a layer of encryption that prevents others from snooping on or tampering with traffic to your site. When HTTPS is enforced, your site will only be served over HTTPS. [Learn more about securing your GitHub Pages site with HTTPS.](#)

## Visibility

GitHub Enterprise

With a GitHub Enterprise account, you can restrict access to your GitHub Pages site by publishing it privately. You can use privately published sites to share your internal documentation or knowledge base with members of your enterprise. You can try GitHub Enterprise risk-free for 30 days.
